

## The Hanging Veil

The hanging veil as described by the following guidelines is approved for general use by our sisters along with the fitted veil already in use.

1. Concerning size, the veil should cover the top of the head at least as far forward as the ears and hang to the hairline or below in the back. The following drawing gives a visual presentation.

2. The black or white veil made of plain material that is nearly opaque, may be worn without a lace trim.
